BOIL WATER ADVISORY

Town of St. Joe Water Department

To: Water customers on all streets east of S. School Street, including Washington St, 4th St, Widney St, Mill Dr, Harrison St, 1st St, and St. Joe Village Mobile Home Park

On Tuesday, November 24 and Wednesday, November 25, 2026, beginning at 8:00 AM each day, water service in the area above will be shut off while crews connect a new water main. Because the system will lose pressure during this work, the Town of St. Joe, in consultation with the Indiana Department of Environmental Management (IDEM), is issuing a precautionary boil water advisory for this area once service is restored.

Until further notice:

- Bring all water used for drinking and cooking to a complete, rolling boil for 3 to 5 minutes, then let it cool before use.
- Use boiled or bottled water for drinking, making ice, brushing teeth, preparing baby formula and preparing food.
- Please use only the water you need for household and personal use.

Bacteriological samples will be collected from representative sites in the affected area. The advisory stays in effect until those results come back satisfactory. We will update you until the issue is resolved and will notify you when boiling is no longer necessary.
